

Customized

Choosing Nova means only paying for what you select.

✓ After you initially select your CPU, RAM, and Disk, you may adjust all three at any time. Our Premium Storage Tier is also available to Nova customers.

✓ Enjoy complete segregation of virtualized hosting customer environments (unless otherwise requested).

✓ Connect to Nova from on premise co-located hardware.

✓ Configure guest level protections including firewall, intrusion detection, and agentless anti-malware.

✓ Nova backups allow you to manage the backups of your virtual machines within the Nova environment.

Reliable

Nova is consistent in quality and performance. To make this happen, we employ:

- A back-up generator and uninterrupted power supplies that ensure no loss of power.
- Site protected by sophisticated dual fire suppression systems.
- Circuits that are interconnected to independent PDU's delivering 220/110v. Dual A/B feed PDU connections are also available.
- Equipped with temperature and humidity sensors. Water sensors are centrally monitored.
- Multiple Internet Service Provider carrier networks are provided in our hosting center.

Secure

To remain ahead of the curve with global security standards, Nlets is aligned with the stringent FBI CJIS Security policies, standards, and guidelines.

- 24x7x365 protection of our facility and data center with state-of-the-art commercial video surveillance and security.
- Two-factor authentication required for building and data center access.
- Regular security awareness training for all Nlets employees.
- An extensive pre-employment background investigation for all new employees; including a 10-print based state of residency and national criminal history record check.
- Triennial audits by the FBI CJIS Division.

Who We Are

Since 1967, The International Justice & Public Safety Network - Nlets has created dozens of secure partnerships for securely exchanging data and providing criminal justice information sharing.

We are uniquely positioned to offer Nova, the Nlets Secure Cloud Platform, as our most modern solution for the law enforcement community.

Why Nova?

☞ Nova gives [us] peace of mind and assurance to our business security and privacy efforts. We chose Nova to closely align ourselves with CJI in ways that we could not through other vendors. Nova makes it easy to integrate with outside vendors, allowing us to optimize with cloud native platforms, getting the best of a hybrid world.
